

To improve the performance of design works and quality of designed products here in "IOT" computer information complex is established and effectively operated.

- As CAD- platform we use licensed Autodesk products: AutoCAD MEP, Civil 3D, Architecture, which is complemented with other specialized design and graphics software, developed both in-house and by third-party organizations.

- To ensure document collaboration our specialists have developed and introduced elements of electronic document management based upon Lotus Notes Domino. Moreover, convenient for sharing network resources are used.

- For project management we use Oracle Primavera P6 Professional R8.1.
