

Our experts design new and unique objects for Ukrainian and abroad such as slurry and oil and oil product pipelines, and also carry out projects for the modernization, retrofiling and technical equipping, expansion of production capabilities, implementation of modern innovative systems. Latest examples are reconstruction of quay SE "Mykolayiv MTP" under oil loading complex or reconstruction and technical re-equipment of existing facilities at SE "Feodosiya ESPP" and the creation of technology for marine handling of viscous oils.

Our experience list

- [Oil and oil product pipelines](#)

- [Pump Stations, Tank Farms, Oil Depots, Terminals](#)

- [Slurry pipeline](#)
